

November 2021

Expliseat recognized by Airbus as Finalist for the Innovation Award.

Expliseat was shortlisted as a top 3 finalist for the **Airbus Innovation Award**. During the 2021 Global Supplier Conference, Airbus recognized Expliseat **advanced seating technology, contributing to a more efficient and sustainable aviation.**

Other finalists are GE and Otto Fuchs selected among the Airbus' 12,000 global suppliers.

After successfully entering the **A320 family BFE catalogue** in April 2021, this testimony is very important giving the in-depth knowledge of Airbus on all existing seats and new projects to come where Expliseat has always positioned itself **10 years ahead of its competitors.**

Latest innovations made by Expliseat include:

- New **TiSeat E2 S-line and X-line**, the first family of passenger seats made in carbon fiber and titanium that **reduce the weight by 35% for optimum operational efficiency** while offering same or better passenger experience when compared to traditional seats in aluminum,
- **Faircraft technology**, the first certified and flying seat components made in **recycled carbon fiber** that help to reduce carbon footprint and cost while improving performance when compared to traditional solutions in plastic or honeycomb.
